Dear Sir:

6914 '99 JUL 22 P2:11

I am adamantly opposed to  
radiating food and/or food products.

Radiation does kill some harmful  
bacteria — but will we create new  
and more potent bacteria mutants  
that we may not be able to kill?

Furthermore, radiation that kills  
the bacteria also kills the food leaving  
it lifeless and not a food at all.

Please, Please

Demand all radiated foods be  
overly conspicuously labeled.

And, then demand food sources — all  
of them, farmers, processors, packers, etc., etc.,  
clean up their operations to provide  
healthy, live, yes live, foods for  
all.

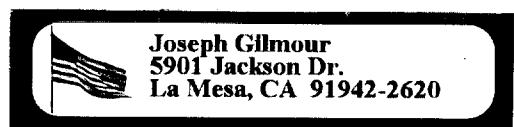

Obviously, I will be watching for the  
results of your deliberations and hope so  
advised Boxer, Feinstein and Hunter.

Thank you for your consideration.

98N 1038

Sincerely,  
Joseph Gilmour
